How To Use

This user manual aims to familiarize you with the functional processes of the AYUSH Intelligent Medicine Management System.

Mandatory Instructions to be read before using this manual:

In this user manual, Individuals who have been provided with the credentials can log in to the application by using their respective credentials.

- Individuals who have been provided with access to the AYUSH Intelligent Medicine Management System have been assumed to be Users of this application.
- Dispensaries, who have been authorized to use the said application, have been referred to as you.
- Web-page-wise screenshots have been attached for your reference.

Purpose

This user manual has been created to introduce the functional processes of the proposed AYUSH Intelligent Medicine Management System to the Uttar Pradesh State Ayush Society, Government of Uttar Pradesh. The manual aims to provide a comprehensive explanation of all aspects of the portal.

The intended audience for this document is the personnel of the Uttar Pradesh State Ayush Society, Lucknow who are already familiar with the organizational processes. The manual will enable them to understand the behavioral details of the web application described in this document.

The user manual covers all the information related to the **Dispensary Panel of AYUSH Intelligent Medicine Management System** and provides step-by-step systematic instructions for using the portal. It explains how to access the dashboard and the Dispensary module that are available.

Overview

The healthcare sector is continually evolving, and one critical aspect of this evolution is the efficient supply and distribution of medical products to ensure that patients receive the care and medicines they need.

This Introduction sets the stage for a transformative journey into a digital age where the seamless flow of medicines is not just a logistical imperative but a cornerstone of patient-centric healthcare.

In the dynamic landscape of healthcare, this emphasis on ensuring patients receive timely and precise care becomes increasingly paramount. A pivotal aspect of this evolution lies in optimizing the supply and distribution of medical products, navigating the complexities of a landscape where speed and accuracy can significantly impact patient well-being.

Modules for the Ayush Medicine System

Central to this transformative endeavor are the distinct modules, each meticulously designed to play a specialized role in enhancing the efficiency and effectiveness of the medicine supply chain. These modules include:

- Dispensary Panel
- District Panel
- CMS Panel
- Director Panel

• Administration Panel

About MARGSOFT Technologies Pvt. Ltd.

MARGSOFT Technologies (P) Ltd. is a leading ISO certified IT Company with over two decades of pragmatic domain experience in the Government and Corporate sector and spanning presence across Singapore, UAE & USA. MARGSOFT fosters a quick and agile technological environment to provide FAST, SMOOTH & RELIABLE IT solutions, and services to different industries and segments. MARGSOFT works as a system integrator by delivering robust and innovative projects with deep tech technologies like Al/ML, IoT, Blockchain, RPA & Open Source Technologies enabling its clientele to streamline their business processes in sync with global standards.

Uttar Pradesh State Ayush Society

Department of AYUSH, Ministry of Health and Family Welfare, Government of India has launched the National AYUSH Mission (NAM) during the 12th Plan for implementing through States/UTs. The basic objective of NAM is to promote AYUSH medical systems, facilitate the enforcement of quality control of Ayurveda, Siddha Unani, and Homeopathy drugs, and sustainable availability of ASU & H raw materials. It envisages flexibility in the implementation of the programs which will lead to substantial participation of the State Governments/UT. The NAM contemplates the establishment of a National Mission as well as corresponding Missions in the State Level. NAM is likely to improve significantly the Department's outreach in terms of planning, supervision, and monitoring of the schemes.
